

# Label validation made simple

Die cut dimensions, size and shape

Claims, warnings, ingredients and address

Promotions and bar codes

Quantities and symbols

Pictograms, brand logos and colors

Local variants & multimarket support

Let the Pixel-AI engine validate your artwork, saving time and costs, increasing your accuracy and simplifying your processes.

Our system meticulously verifies product labels providing confidence in accuracy, brand standard, language translation, dimensions and regulatory compliance.

**95%**

system accuracy<sup>(1)</sup>

**60%**

faster than manual validation<sup>(1)</sup>

**50%**

in savings<sup>(1)</sup>

## Key features

- Effortlessly ensure the highest quality in your artwork through our Pixel-AI engine.
- Automatically compares and validates the finished artwork against the design brief ensuring all the data is correct.
- Save time and reduce errors with seamless cloud execution which learns as you grow.
- Streamlined integration for language and country-specific feature extraction.

Boost your business with our cutting-edge solutions and unlock extraordinary growth opportunities.

# Label Validation through Artificial Intelligence

## MULTIMARKET

Multiple languages & metric systems support.

## PERIODICITY

As needed.

## DIMENSION CHECKING

Ensuring content is with the specified dimensions as per the design brief.

## AI POWERED

Increased accuracy by learning every single Artwork processed.

## ACCURATE DATA CHECK

Increased precision & printing quality.

## TIME CONSUMPTION

Focus teams on important tasks instead of tedious work.

## ADAPTABILITY & INTEGRATION

Seamless integration with current artwork management.

## COMPLIANCE

Ensure your artwork is compliant with local regulations and rules and identifies fraud.

## Transforming Complexity into Easy-to-Follow Steps<sup>(2)</sup>

- 1 SELECT** the features to check.
- 2 COLLECT** artworks datasets.
- 3 TRAIN** the AI engine to fit your needs.
- 4 DEPLOY** the model on cloud.
- 5 OPERATE** on your day to day business.
